

## Product Specification Sheet

### In-Table Feed Guide for Model 793 Slicer

The new Feed Guide for the Model 793 slicer is retrofittable to all Model 793 slicers.

The mounting bracket to attach it to the conveyor uses holes that already exist in the conveyor, so no need to drill new holes in your machine.

The proper positioning of the kicker paddle moves to the infeed end of the guide after installation.

The guide is fully adjustable for product width. It can be removed by taking four bolts out from the mounting bracket to allow removal of the turn table.
